

Hard in 60 Minutes

Plex-Stick Aqua

Underwater Repair Epoxy Putty

REPAIRS AND REBUILDS ANYTHING MADE OF FIBERGLASS

READ ALL INSTRUCTIONS BEFORE USING

Apply Plex-Stick to wet or dry surfaces and cures under water.

DIRECTIONS

1. Cut or break off the amount of Plex-Stick needed to repair the damaged area. You can save the rest and use it at a later date. Replace the silver dot on the unused portion.
2. Mix the putty by folding, rolling, and squeezing it until it is uniform in color. Make sure all streaks are gone.
3. Apply to the surface to be repaired within 10 minutes of mixing. For best results force into cracks or holes and strike off excess Material, preferably with a tool moistened with clean water.
4. Plex- Stick Aqua has a 25 minute work life and will cure in about 60 minutes. For best results use damp fingers to mix and apply for a smooth appearance of the cured compound. Remove any excess material before hardening begins.

Once the putty has fully hardened it can sanded, painted, or drilled.

WARNING

Keep away from children

Harmful if swallowed. If swallowed call a physician.

Eye irritant. For eyes flush with water and call a Physician.

Mfd. In U.S.A. for ESPEX INTERNATIONAL LLC, P.O. BOX 210817, ROYAL PALM BEACH, FLORIDA 33421
